The mission of Paintball club is to reach out to those who enjoy playing the sport of paintball and give each individual the ability to play in a recreational fashion. Paintball is a fast paced, exciting sport. It challenges each individual to act quickly and push their bodies physically. There are many Kettering Students who enjoy this sport and are looking for a way to participate, but do not have a club to participate in. Paintball Club will help those people who are interested in playing the sport to have an area to practice with others who share that same interest. Membership in Paintball Club is open to any participant that is interested, and greatly encouraged to those who have never participated. We understand that paintball is not a sport for everyone and encourage anyone to try it even if they are not interested because the odds are they will have a great time.

Understandably, the sport of paintball does have risks when one participates, but if all safety principles are followed it is one of the safest sports out there. The reason behind this is that it is not a direct contact sport. In sports like basketball or football, there is a much greater risk for injury because the size of the object which could possibly hit or injure an individual. The only risk for paintball is the face region but is easily remedied with protective face gear which is required to be worn at all times while playing paintball, thus greatly reducing the risk. Paintball Club will teach all members proper safety when playing the sport of paintball as well as implement strict rules which will be enforced to the highest extent to ensure safety.

Paintball Club will meet at RJ Performance in Davison for practice. RJ Performance has an indoor paintball field which uses rebalis instead of paintballs. Rebails are rubber equivalents to paintball and are reusable. This makes the cost of paintball much cheaper and able to be managed much easier. Paintball is a relatively new sport, but is growing rapidly. There are many college level tournaments for college teams and Kettering University should take advantage of this opportunity to help students participate in these events. These provide a great opportunity for Kettering students to network with other colleges, as well as interact with other college students who love the sport of Paintball. Paintball Club will take advantage of these tournaments to get Kettering’s name out into that realm and at the same time allow those who love the sport of paintball to compete against other colleges. I believe this is a great opportunity for all Kettering students who have interest in playing this sport and would greatly appreciate the ability to play at the college level.
